

OMNISHARES

Master Backbone & Product Specification

Reconstructed from the original vision through the current portfolio-tracker direction

Vision: An AI-powered investment platform for African stock markets, starting with Kenya's NSE, combining market intelligence, portfolio tracking, research, analytics and eventually broker integrations.

1. Foundation / Technical Skeleton

- **Frontend:** React, TypeScript, Tailwind CSS, Recharts
- **Backend:** Python / FastAPI
- **Database:** PostgreSQL
- **Authentication:** JWT, with future Google login
- Conceptual flow: Frontend → REST/API → FastAPI → PostgreSQL, with separate market-data and AI layers.

2. Main OmniShares Navigation

- Dashboard
- Markets
- Companies
- Portfolio
- Sectors
- Screener
- Watchlist
- News
- AI Assistant
- Settings

3. Dashboard

- Portfolio Value, Today's Change, Total Profit/Loss, Cash Balance and Dividends.
- Portfolio Performance chart.
- Market Overview: NSE 20, NASI, selected stocks and market movers.
- Top Gainers, Top Losers, Most Active and Highest Dividend sections.

4. Portfolio / My Investments

- Total Value, Invested Capital, Cash, Profit/Loss, Return % and Dividends.
- Holdings: company, shares, average buy price, current price, market value, profit/loss and return %.
- Interactive portfolio performance chart.
- Portfolio allocation by sector, company and asset.
- Transaction history, dividends, deposits and withdrawals.
- This is the core of the new personal investment tracker requested for OmniShares.

5. Personal Investor Account

- Profile, CDS details, KES balance, holdings, investment goals, performance, portfolio health, activity, bank/M-Pesa and tax settings.

6. Company Pages

- Current price, day change, market cap, P/E, EPS and dividend yield.
- Interactive price chart with 1D, 1W, 1M, 6M, 1Y, 5Y and MAX periods.
- Fundamentals: revenue, profit, EPS, ROE, debt, assets and cash flow.
- Dividend history, valuation, risk analysis and OmniScore.

7. OmniScore™

- Standardized company score combining Value (20%), Growth (20%), Financial Health (20%), Dividend (15%), Risk (10%), Momentum (10%) and Management (5%).
- Example presentation: OmniScore 82/100 with individual factor scores.
- Designed to make stock research easier without reducing investing to a single number.

8. Sectors

- Banking, Energy, Insurance, Telecom and other NSE sectors.
- Portfolio allocation by sector.
- Concentration warnings when one sector becomes disproportionately large.

9. Screener

- Filter companies by dividend yield, P/E, earnings growth, debt, OmniScore and other fundamentals.
- Return a ranked table of matching companies.

10. Watchlist & Alerts

- Track selected companies.
- Future alerts: price targets, OmniScore changes, dividend announcements, earnings releases and major news.

11. News

- Focus on Kenyan listed companies and the NSE.
- Eventually use AI to summarize important developments rather than requiring the investor to read everything.

12. AI Assistant / OmniAI

- Answer questions such as 'Should I buy COOP?' using valuation, earnings, dividends, financial health, momentum, risk and portfolio exposure.
- AI should provide analysis and recommendations with transparent reasoning.
- Any future trading action must require explicit user confirmation.

13. Database Backbone

- Users
- Portfolios

- Holdings
- Transactions
- Dividends
- Deposits
- Withdrawals
- Companies
- Prices
- Financials
- News
- Watchlists
- Alerts
- AI Scores
- Settings

14. Data Flow

- NSE / market sources → Market Data Layer → PostgreSQL → FastAPI → OmniShares Frontend.
- Company data → OmniScore Engine → AI Analysis → Company Page → Investor decision.

15. Development Roadmap

- **Phase 1 — Working MVP:** branding, professional dark interface, dashboard, NSE companies, company pages, charts, portfolio, watchlist, KSh currency and sample data.
- **Phase 2 — Real Investor Portfolio:** accounts, holdings, transactions, deposits, withdrawals, dividends, P/L, charts and sector allocation.
- **Phase 3 — Real Market Data:** live/updated NSE prices, fundamentals, dividends, financial statements and news.
- **Phase 4 — Intelligence:** OmniScore, screener, AI company analysis, AI portfolio analysis, risk analysis, sector analysis and alerts.
- **Phase 5 — Investment Ecosystem:** broker integrations and broader African market coverage.
